Help us put a stop to domestic abuse and intimate partner violence in Utah. Know the facts and support legislation that promotes safety and prevention.

1 in 3 women experience domestic abuse or intimate partner violence in their lifetime

Anyone can be a victim of domestic abuse or intimate partner violence

Since 2000, 42% of adult homicides were domestic violence related

The majority of domestic violence homicide victims are female

More than half of homicides were perpetrated by a family member, cohabitant or intimate partner*

*In several years between 2000 and 2015

Only 2% of victims had a protective order at the time of their death

Children witnessed 22% of domestic violence homicides

Men were the perpetrators in 88% of domestic violence related murders

The majority of male perpetrators of domestic violence homicide used a firearm, had a criminal domestic violence history and should have been restricted from firearms

Only 12% of male domestic violence homicide perpetrators had been court ordered to attend an intervention program; the majority of male homicide perpetrators die by suicide
